**Attachments:** Bottom up letter-08-26-2014 left-justified and empty line added.docx; ATT29796

Text looks fine, and passes spell check, but I did not read word-for-word today.

References have an indenting that looks a little odd to me. The instructions to authors page from Reg Tox and Pharm suggests there are not specific formatting requirements (although they apparently felt it had to be double-spaced in submission. But, the example they provide of references on that page (<http://www.elsevier.com/journals/regulatory-toxicology-and-pharmacology/0273-2300/guide-for-authors#20300>) at least on my screen shows that when it is two lines both lines are left-justified.

If you think it matters, I made that change in the attached, but to make it easier to see the start and stop of a reference, I also inserted a blank line. I don't know if any of this matters.

David

## References

References should be cited in the text by the first author's surname followed by et al. If only two authors are listed, both names should be cited. References should be listed alphabetically by name. Journal names should follow the style of the latest edition of the Chemical Abstracts Service Source Index. Only articles that have been published or are in press should be included in the references. Unpublished results or personal communications should be cited as such in the text.

**Subject:** FW: Please edit your submission

I will need to resubmit our paper (see below). The revised version is attached. Let me know (quickly) if you see anything that needs changing.

Jennifer, I will correct your information, also.

Regards,

Kenny
